Name of beer Ya Da Sun Hefeweizen

Type of beer Traditional German Hefeweizen

Description All Hefeweizens are not created equal. The reason German breweries make such great Hefeweizen beer is because they understand the intricacies behind the production of these beers. It's not just throwing a "Hefe" yeast at a wheat base and expecting something special. These beers take decoction mashing, special temperature steps during the mash and a precise amount of yeast at pitch to give you the right balance of spicy clove and banana. Sample the fruits of our studies and enjoy what we have learned.

Ya Da Sun is a celebration of the sun and Summer in general. Enjoy this beer in the short warm season in Wisconsin. Before you know it, the snow will be flying again.

ABV% 5.25%
